Product Details

M202

MAGNETIC PICKUP:
intrinsically safe, standard reach

The low output of this magnetic pickup makes it intrinsically safe and CSA approved for use in hazardous areas. It has a standard reach (1.125 inches) and a 5/8-18 thread.

Most CSA-certified pickups retain that approval only when used as part of a specific certified system or assembly. UL, CENELEC, and some CSA approved pickups may be used with any instrumentation.
