

MPI Ignition Transformers

Murphy Power Ignition “Smart” transformer coils are designed for true secondary diagnostics and prognostics. All coils have a secondary monitoring lead that when used in conjunction with the MPI Ignition System provides in-depth diagnostic / prognostic information as well as providing “Automatic Spark Energy Control” that will extend spark plug life and reduce unscheduled downtime.

ITX150-6

- 6” Integral Coil
- CSA approved
- 200-300 uS duration

ITX150-12

- 12” Integral Coil
- CSA approved
- 200-300 uS duration

ITX200-RM

- Remote Mount Coil
- CSA approved

ITX230-RM

- Remote Mount Coil
- CSA approved
- 400-500 uS duration

ITX230-FM

- Flange Mount Coil
- 400-500 uS duration

ITX230

- Open Coil, Non-Hazardous
- 400-500 uS duration
